

Lecture 4

deep learner

Surface learner

good students / teachers

bad students / teachers

Level 1: What students are?

Level 2: What teachers do

Level 3: What students do

1 8 7 25
└ ┐ ┐ ┐ ┐ ┐

Association

Old knowledge with new knowledge

Deep Learning

SOLO Taxonomy

SOLO 5 abstract extended { to generalize
to theorize

SOLO 4 relational { to relate
to compare

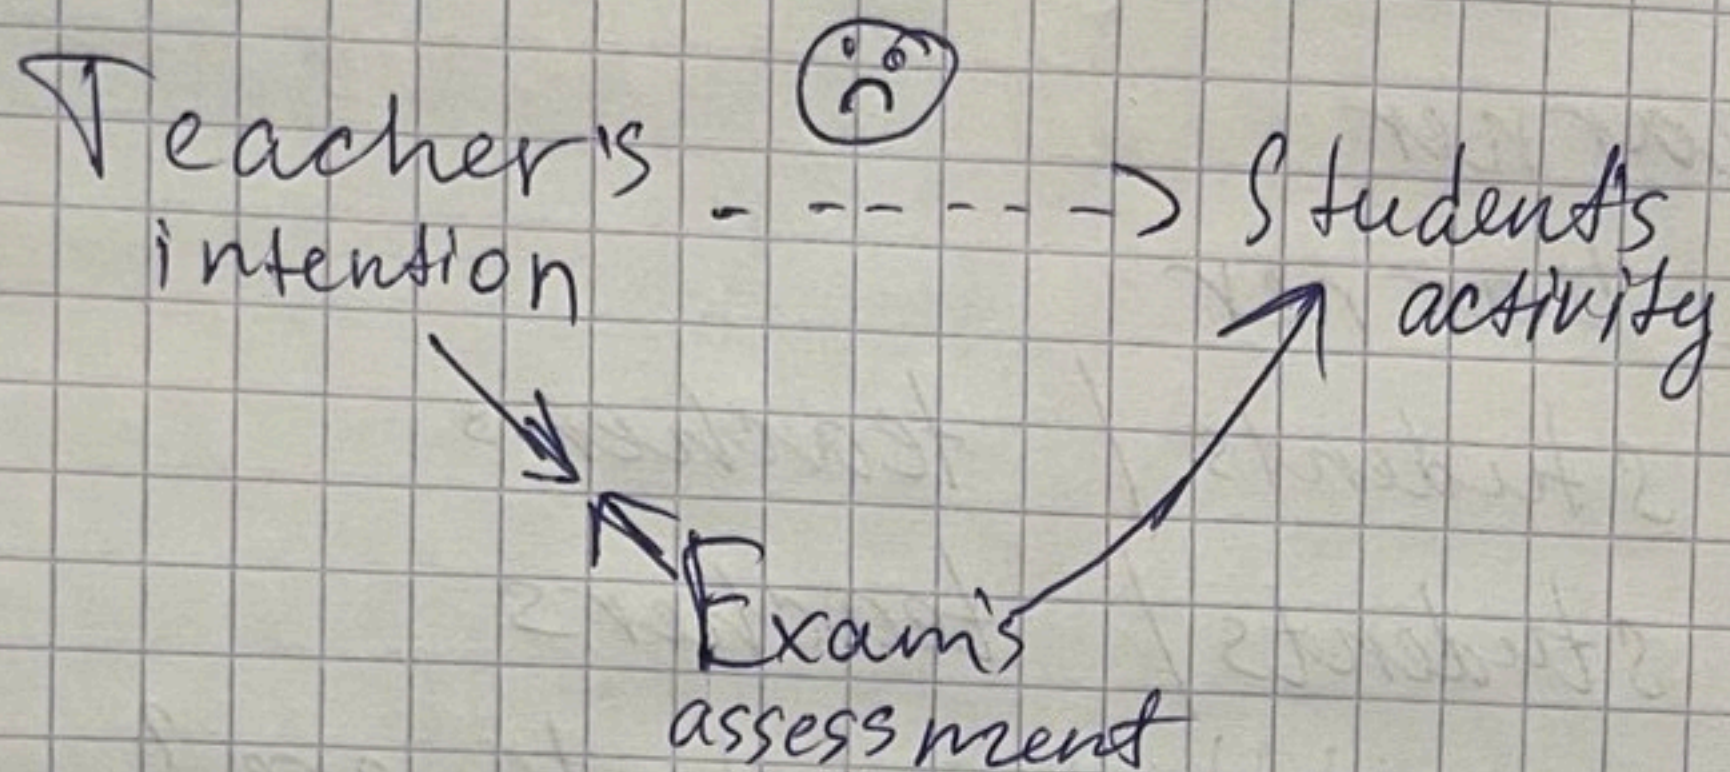

Surface Learning

SOLO 3 multi-structural { classifying
to combine

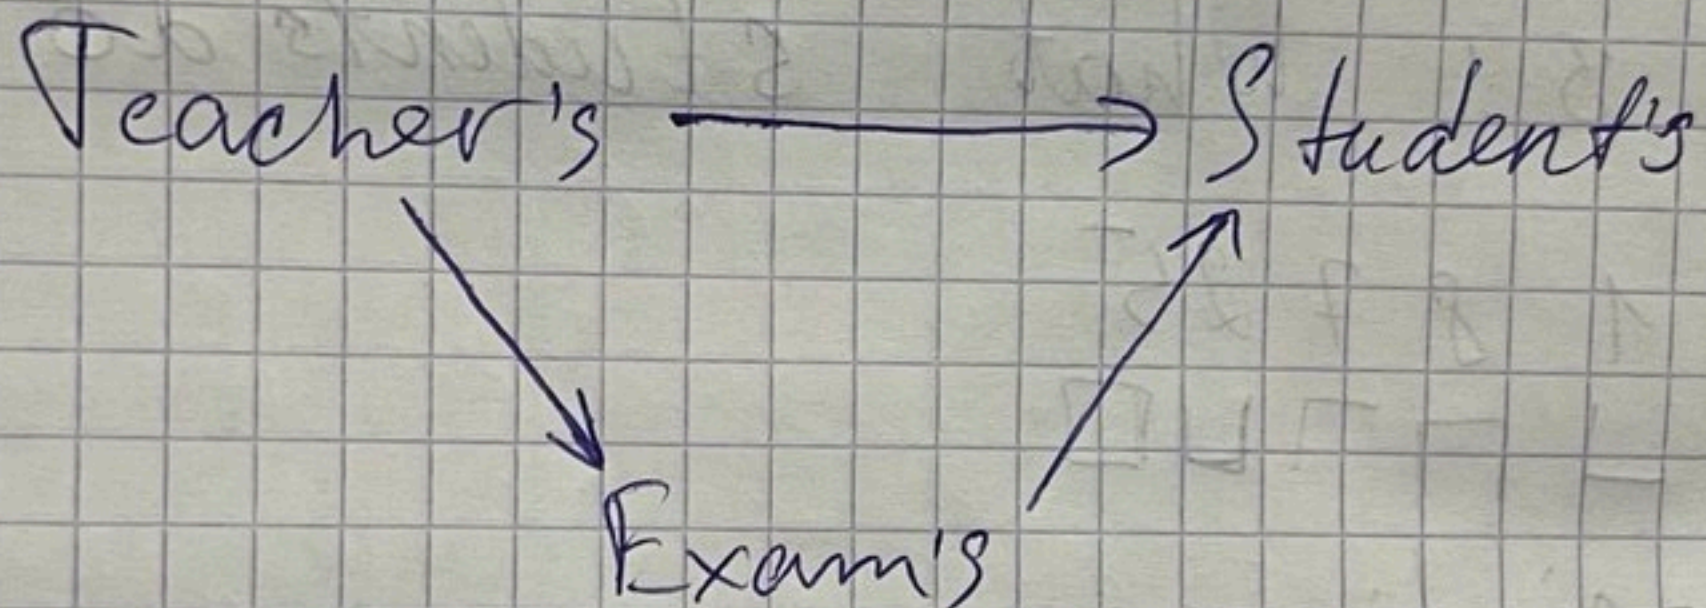

SOLO 2 uni-structural { to identify to recite
to do procedure

SOLO 1 pre-structure { no understanding
no knowledge

Unaligned Course

Aligned Course

Laws and Regularities of Teaching

Law of teaching is an objective, essential and stable connection between the phenomena and components of the educational processes.

Regularities of teaching

External regularities
goals and content determined by social needs
level of development of science
culture and technology

Internal regularities
the unity of teaching and learning
Learning outcomes depend on the activity and motivation

The concept of principles of teaching
Laws $\rightarrow$ regularities $\rightarrow$ principles $\rightarrow$ methods
and forms of teaching.

Modern principles of Teaching

Principle of visibility

Principle of durability of knowledge acquisition

Principle of linking theory with practice

Principle of individualization and differentiation

How do you understand the Term "Competence"?

Competence is a fundamental measure of
learning and teaching.

"Competence" (as a capacity, applying to persons)

"competency" (as a disposition, applied to specific
abilities, skills or activities)

Knowledge

First kind of knowledge: acquaintance knowledge.

Second " $\downarrow$: knowledge of facts

Third " $\downarrow$: knowing how

Skill is the learned ability to perform an action, $\downarrow$ under
with determined results with good execution often with ~~with~~ conditions
